BRING THE LIVING ROOM - OUT DOORS

Home Grounds Should Have Privacy

A sense of privacy in the yard, some shelter from the public gaze, is much to be desired. This partial seclusion can readily be secured through taller plantings made along the lot boundaries.

Within this sheltering "wall-of-green" there are ideal locations, in an inner border, for flowering plants and garden features.

You Can Develop Your Yard So That it Invites Use

An open central area of well-kept lawn beckons the foot-steps. A shapely tree or two for protection with suitable garden seat or chairs in their cool shadows will create a lure to the garden that is irresistible.

Children play safely in such a foliage-protected yard and the entire household turns gratefully to such surroundings for healthful pleasure and recreation.

Add seclusion and year round beauty to your home grounds.

The Out Door Living Room

The style for beauty, seclusion and use outside the home is upon us—and this new style finds its most charming expression in the Modern Outdoor Living Room.

Right in your own home yard, no matter what its size, there is an opportunity to create a shelter-spot. There, in sheltered seclusion, you can find rest and ease in the quiet beauty of the out-of-doors.

A delightful "out-of-doors living room" can be made without elaborate settings. All that is needed is a tasteful and proper arrangement of plantings and simple accessories that provide comfort and relaxation.

Actual H & O Reproductions

The photographs contained in this catalog illustrate landscape-plantings "by HOLM & OLSON", demonstrating how the principles of gardening can be applied to the development of your home grounds. They illustrate the modern treatment of planting directly about the house, the Out Door living room, Flower Borders, correct Tree planting, Evergreen settings and Lawn building.

A study of these photographs will help and give you a working knowledge of modern landscape planting and act as a guide to improving your home grounds.

A well planned garden is a source of peaceful relaxation and a cause of lasting satisfaction. The best way to achieve this is to build your garden from the finest materials available.

Choose your plants carefully—in this book we have striven for accuracy of description and adaptation. Please note—all material listed in this catalog is hardy and northern grown.

Plant Evergreens

FOR
ALL-YEAR AROUND
BEAUTY

The beauty of appropriate evergreen plantings add permanently to the charm of this attractive home.
Planned and planted by Holm & Olson Landscape Gardeners.

EVERGREENS are our most important group of trees, they grow naturally in our northern soil and climate. Evergreens are particularly appropriate and well suited for use in the landscape plantings throughout this section. For groups on the lawn, as a background to the garden or in plantings by the doorway and around the house foundation the Evergreens will delight you in all seasons with their cheerful green color. We will be pleased to help you select suitable varieties for your grounds.

At the Park Nurseries the Evergreens are given particular attention to develop their full beauty and symmetrical growth. They are dug with solid root balls so that they can be moved without loss of vitality. Full planting directions are always given to assure you the best results. **COME TO THE NURSERY AND SEE OUR EVERGREENS.**

To help you realize how much growing-time you can save when you plant Evergreens of substantial size WE GIVE THE AGE, AS WELL AS THE SIZE, OF THE OLDER TREES along with their prices.

Shade and Ornamental Trees

A Tree adds to the beauty of Nature and Comforts of Man.

Bring Comfort and Beauty To The Home Grounds

THE attractiveness and comfort needed to complete a landscape setting is the proper placing of desirable trees. Thought given to selecting the best varieties for a particular use is important. In the border they may be used as accents, on the lawn to provide welcome shade, to cast interesting shadows, to supply flowers, fruit and foliage effects. A tree or group of trees add a feeling of quiet thoughtful repose to home atmosphere. We will gladly help you select suitable varieties for your grounds.

Since trees reach their maturity slowly you can save years of waiting by using larger sizes. That you may better judge the time saved by planting older stock we give both the sizes and the approximate age with the prices in our catalog listing. COME TO THE NURSERY AND SEE OUR TREES.

Flowering Shrubs

**FOR EARLY
FRAGRANT BLOOMS**

Much of the beauty and charm in landscape planting comes from the free use of flowering shrubs. Their delicate coloring, fragrance and profusion of bloom entitles them to an important place in your home yard.

After the flowering season their colorful foliage, brilliant berries, together with their colored twigs and branches in winter add year round beauty and interest.

It is the softening grace of the dwarf and medium height shrubs when planted about the foundations that creates the transformation from bareness to beauty. The taller shrubs find their proper place as specimens in the lawn or in the border along the lot boundaries to give privacy or to screen out unattractive views.

A large area of our nursery and the skill of experienced gardeners is devoted to developing our shrubs into sturdy, handsome plants that will quickly bring attractiveness to your home grounds. Allow us to help select suitable varieties for your grounds. Come to the Nursery and see our flowering shrubs.

Sow "Velvet Sod"—the best grass seed. "Velvet Sod" makes a lawn of lasting beauty.

H & O "High Test" Lawn Grass Seed

Good lawns can only follow the use of clean, pure seed of high germination test. H. & O. High Test Seed is dependably good—selected, re-cleaned seed that is the best quality that we can secure.

AMOUNT OF SEED TO SOW—Allow one pound of seed to every 200 square feet of new lawn area. For re-seeding on old lawns one pound of seed to 400 square feet will be sufficient.

HISTORY BEHIND A QUALITY GRASS SEED MIXTURE

Grass seeds are usually purchased under brand names, the basis of all good grass seed mixtures must be the same. The important feature of a good mixture is that it must contain heavy well developed seeds from selected grass stocks that have been grown and cured for the distinct purpose of seed production.

Purity of the seed, free from weed seeds, germination and weight per bushel are the important factors to consider. Avoid mixtures that contain annual weed seed, Timothy and domestic Rye grass.

Kentucky Blue grass and Red Top are the basic seeds used in good grass seed mixtures.

Prices are given for seed packed and ready to ship. Add 6c per lb. for parcel post shipment in small quantities.

"Velvet Sod" Seed

"Velvet Sod" Lawn Seed is an unusually high grade and careful mixture of permanent fine-bladed, rich green grasses. Specially prepared to meet the climatic conditions of our northern states. Its high weight of 25 lbs. per bushel indicates its purity and freeness from chaff and adulterations. We use this seed on all our own landscape work and recommend it as the best seed obtainable.

1 lb. 80c; 5 lbs. \$3.80; 10 lbs. \$7.50; 20 lbs. \$14.50

White Clover Seed

The best imported white Dutch clover with small leaves and dense growth. Very often sown with other grasses, particularly in a new lawn, where it helps cover the ground, thicken the sod and so tends to crowd out weeds.

1/2 lb. \$1.10; 1 lb. \$2.00; 5 lbs. \$9.75

Red Top Grass

Red Top is a fine-leaved grass that germinates and develops very quickly. It is of particular value in getting a new sod established. For a permanent lawn it should not be sown alone.

1 lb. 55c; 5 lbs. \$2.50; 10 lbs. \$4.75; 20 lbs. \$9.00

Creeping Bent Grass

Sea Side Bent—A true, unmixed creeping bent seed. It produces a thick, low and close-growing turf for lawns and golf greens. (Creeping Bent sod requires often and close cutting and special attention in fertilizing.)

1 lb. \$2.00; 5 lbs. \$9.75; 10 lbs. \$19.00

Shady-Side Seed

Where ordinary grasses will not grow we suggest sowing this special "shady-side" mixture which contains varieties naturally tolerant to shade. (Extra attention to fertilizing and watering is very important under these shade conditions and a light re-seeding each spring helps maintain the sod.)

1 lb. 80c; 5 lbs. \$3.80; 10 lbs. \$7.50; 20 lbs. \$14.50

Kentucky Blue Grass

A beautiful grass that should be the main constituent of every good lawn here in the north. It is sometimes used alone but as it develops slowly, it becomes better established if sown in a mixture. Our seed is a very choice grade of carefully re-cleaned extra heavy seed with an average weight of 25 lbs. per bushel.

1 lb. \$1.00; 5 lbs. \$4.75; 10 lbs. \$9.00

Flowering Perennials

FROM
EARLY SPRING UNTIL
LATE FALL

You too can have flowers to enjoy all summer from a garden of perennial plants.
This border planned and planted by Holm & Olson.

FLOWERING perennials are the backbone of the flower garden, most of them repeating faithfully each year with a minimum of attention. These plants live in the open ground. Many are useful as cut flowers, others for border displays or the Rock Garden. The best effect is usually produced by setting the plants out in separate groups of three or five of one variety.

You will find listed here not only the older favorites but many new, choice varieties and novelties. Dependable and hardy all through the North.

Park Nurseries Perennials are sturdy 2 year old, field-grown plants that are dug freshly to your order. We make no attempt to compete with the ordinary offerings of Perennial plants. We grow and distribute the better strains of quality plants. Come to the Nursery and see our plants.
